SEACHANGE SERIES ®

Elegantly designed yet cleverly practical, our engineered laminated bamboo holds a Global GreenTag Level A rating, guaranteeing sustainable manufacturing practices. The SeaChange Series® helps deliver innovative and imaginative projects with elegant battens and pre-made screen solutions that are perfect for shading, privacy screening, fencing and cladding.

As a superior alternative to timber, these panels are engineered from laminated bamboo strips, creating slats that are lighter, stronger and more sustainable than traditional timber.

Fixed to anodised aluminium battens, creating modules that are ready for installation, the SeaChange Series® features a number of different styles delivering unlimited flexibility to transform your indoor and outdoor spaces.

COTTESLOE

A BAMBOO LEGACY

At House of Bamboo®, we are carrying on a legacy that was founded last century, when Mark Snyders first began to source environmentally conscious bamboo. Recognised globally as a leading bamboo specialist, we are committed to creating beautiful, environmentally friendly bamboo products and encouraging Australians to embrace the benefits of bamboo.

A SUSTAINABLE FUTURE

In addition to being House of Bamboo® CEO, Jennifer Snyders also pursues her passion for sustainability by advocating bamboo projects throughout Australia and supporting land regeneration and reforestation.

Having qualified at UNSW with a Bachelor of Science (Architecture), she understands the incredible potential of bamboo and her sense of design and technical understanding has allowed her to develop a range of engineered bamboo products that can out perform timber.
