

WOVEN PANELS

TEXTURED/HANDMADE

WOVEN PANELS

Intricately handmade, our bamboo panels are woven into distinctly unique patterns including horizontal, vertical and traditional herringbone.

Increasingly specified by leading architects and designers wishing to create an Asian/Polynesian look, woven bamboo panels are enjoying a renaissance in luxury spaces producing statement pieces that bring a sense of elegance and sophistication.

Our naturally woven bamboo panels are produced only from certified sustainable sources of bamboo and we provide the largest variety of styles and colours in Australia. With a 20-year-plus lifespan and a Global Greentag Platinum Health and Level C Rating these bamboo panels bring a sense of natural style wherever they are used.

A BAMBOO LEGACY

At House of Bamboo®, we are carrying on a legacy that was founded last century, when Mark Snyders first began to source environmentally conscious bamboo. Recognised globally as a leading bamboo specialist, we are committed to creating beautiful, environmentally friendly bamboo products and encouraging Australians to embrace the benefits of bamboo.

A SUSTAINABLE FUTURE

In addition to being House of Bamboo® CEO, Jennifer Snyders also pursues her passion for sustainability by advocating bamboo projects throughout Australia and supporting land regeneration and reforestation.

Having qualified at UNSW with a Bachelor of Science (Architecture), she understands the incredible potential of bamboo and her sense of design and technical understanding has allowed her to develop a range of engineered bamboo products that can out perform timber.
